

MORELLI[®]

M A D E I N I T A L Y

MORELLI HISTORY

Morelli trademark was formed 80 years ago in the Italian city of Florence. Today, the company is run by representatives of the fourth generation of the Morelli family: the Cesare and Paolo brothers, demonstrating one of the most advanced and brilliant enterprises of modern Italian industry.

The company's achievements in the field of design have received international recognition. Paolo Morelli, the head of the company **Morelli**, which is one of the leaders in the production of door hardware, was born in 1967 in Florence. He received an excellent education in Switzerland. Then he worked for many years in a family business founded by his great-grandfather. Since 1993, he became a member of the Board of Directors of **Morelli** and in 1995 its President. In 1973, Cesare Morelli was born, who received an excellent artistic education and in 2000 became the chief designer of the company **Morelli**. Cesare, subtly feeling the demands of the market, invited the leading modern designers to realize their fantasies and create a door hardware that combines the sophistication of forms and decent quality. The result surpassed all the wildest expectations—door hardware **Morelli** firmly won the hearts of consumers with good taste, which allowed the company to take one of the leading places in the industry.

In 2018, **Morelli** decided to enter the **USA** market, as one of the most dynamically developing in the world, in order to give customers the joy of touching the high art.

The General catalog that you hold in your hands is the result of many years work of the whole **Morelli** team and includes more than 17,000 items.

ORO 24K

Gilding 999 samples (24 carats). The technology of electrochemical gilding of metals allows you to create a coating with an improved structure, resistant to corrosion and mechanical stress. Gold coating gives the product additional value and improves its strength characteristics.

PIF FINISH

Morelli presents PIF—a new finish that does not erases with time. PIF—perfect indelible finish – is a highly effective treatment to protect the color and smoothness of the finish for a long time.

ABF - ANTIBACTERIAL FINISH

Antibacterial finish

The finish of silver and copper alloys with antibacterial properties was created to achieve a high level of hygiene in homes and medical establishments.

Living space

Silver refinement and beauty in interior handles. Handles with nanosilver finish (purity 99.99%), which prevents the spread of infections, destroying bacteria, fungi and mold. Silver ions destroy germs.

Medical establishment

Thanks to the nanosilver finish, 99.9% of bacteria and microbes that cause infections die in two hours. The effectiveness is confirmed by tests conducted in medical institutions, schools and sports facilities.

MORELLI®
MADE IN ITALY

An aerial photograph of Earth from space, showing a coastline and a river. The top of the image is a dark, deep red gradient, likely representing the Earth's atmosphere or a specific light effect. Below this, a thin blue line marks the horizon of the Earth. The main part of the image is a high-angle aerial view of a coastal region. A prominent river flows from the bottom left towards the center, eventually meeting the sea. The land is a mix of brown, tan, and green, indicating different terrain types and vegetation. The water in the river and the sea is a deep blue. The overall composition is vertical, with the text overlaid on the right side.
